

The Medical Department of the United States Navy will support the combat readiness of the uniformed services and promote, protect and maintain the health of all those entrusted to our care, anytime, anywhere.

The Virtual Naval Hospital is a digital health sciences library designed to deliver expert medical information to providers and patients at the point-of-care in order to help providers take better care of their patients and help patients live healthier lives.

What...

The Virtual Naval Hospital™ is a digital health sciences library commissioned in 1997 to help meet the information needs of Naval primary care providers and patients. The goal of the Virtual Naval Hospital is to create a digital library that makes the Internet a useful reference and health promotion tool at sea and on land for Naval primary care providers and patients.

For those who do not have regular, reliable Internet access at sea or in the field, the Virtual Naval Hospital is also available on CD-ROM.

The Virtual Naval Hospital provides ready and current reference information to patients and operational providers afloat and ashore, supporting the Joint Health Service Support 2010 pillars of Casualty Prevention and Casualty Care Management.

Contents...
